

Using Nearpod to engage with your students

By Walberto Flores

September 3rd, 2022

Webinar Objectives:

What will we do? Design an interactive learning experience for our students using Nearpod

Why is it important? Interaction with students is a key factor in promoting learning. Whether in face-to-face or distance classes, Nearpod is a tool that will allow students and teachers to generate new experiences.

How will we do it? The workshop-type methodology will allow the participants to know, apply and reflect on the pedagogical value of the tools in order to adapt it to their needs and contexts.

Breakout Room Discussion:

#1

What learning experience has been meaningful to you and why?

If your students could freely and without negative consequences skip your class, do you think they would choose to be in it? Why?

#2

What tool did you find valuable and how will you use it in your classes?
