Abstract:

Teaching English in this changing reality can be very challenging. To better address our students' needs in our in-person, hybrid and asynchronous lessons, we need to think out of the box and provide them with effective feedback that will facilitate their learning. At the end of this workshop, you will identify several feedback tools that can be used in a variety of contexts, as well as a diversified set of strategies to apply them in your classroom.

Workshop Objective:

By the end of the workshop, participants will be able to evaluate online feedback tools identifying at least three options applicable to their contexts.
